

Accessibility Suite Product Overview

The Accessibility Suite is the ultimate collection of learning tools that support reading, writing and studying. The Suite is only available to schools and organizations and is designed to make workstations accessible to the largest number of users in an extremely cost-effective manner.

The Accessibility Suite is the ultimate collection of learning tools that support reading, writing and studying. The Suite also comes complete with tools that support students who are blind or have low vision. The Suite is only available to schools and organizations and is designed to make workstations accessible to the largest number of users in an extremely cost-effective manner.

The Suite is the cornerstone of the Premier In-School and At Home programs as well as the Single Site Learning Solution. Premier software solutions provide students with tools that support reading, writing and studying. These tools provide support that allow students to independently achieve the requirements for graduation and they increase the opportunities for student success. Premier tools create an environment of inclusion, freedom, independence and empowerment allowing students to succeed and excel.

"If we teach today as we taught yesterday, we rob our children of tomorrow." John Dewey

Premier Literacy Floating Toolbar

Launch the *Floating Toolbar* to access powerful learning tools for all your **reading, writing and studying** activities.

E-Text Reader® The E-Text Reader is an overall robust reading, writing and studying tool. E-Text Reader reads the many literature titles now available in electronic format ("E-Books, or E-Text") and documents in Standard Text, MS Word, RTF ("Rich Text Format"), HTML and DAISY formats. It also includes the break-through auditory highlighting feature, enabling users to see and hear the most relevant parts of a document through audible changes.

Universal Reader Plus® Universal Reader Plus is a very easy-to-use utility that reads aloud, and it works with virtually any application. It is ideal for reading email, Microsoft Word documents, web pages and online Flash books. Universal Reader Plus includes the added benefits of Premier's Language Model Information Summarization (LMIS) technology and multi-lingual support.

PDF Equalizer® PDF Equalizer is a must-have software solution that transforms PDF files from mere content to true study tools. With tools that allow the user to select portions of text to be read aloud, navigate complicated charts and diagrams, even save your own notes, PDF Equalizer is the perfect study tool when using PDF files.

Premier Internet Toolbar® The Premier Internet Toolbar is a custom toolbar designed for Microsoft Internet Explorer. It provides a variety of useful tools for accessing and capturing the Internet more efficiently. The Internet Toolbar brings the power of Premier to your internet activities. These tools include but are not limited to:

<i>Talking Pointer</i>	<i>French Talking Dictionary</i>	<i>Summarization utility</i>
<i>Text-To-MP3</i>	<i>English Talking Dictionary</i>	<i>Text Reader</i>
<i>Web Grabber</i>	<i>Zoom In</i>	<i>Zoom Out</i>

**All tools are not shown on the graphic above.*

Scan and Read Pro® Scan and Read Pro is a fully powered scanning application that creates an electronic file for scanned documents. Works with virtually all flatbed USB scanners, all-in-one units and those with automatic document feeders (ADF). Easy-to-use controls get you up and running quickly. It comes complete with voice capabilities for reading, auditory highlighting, multi-lingual support and summarization features.

Text Cloner Pro® Text Cloner Pro is a scanning application with full OCR (Optical Character Recognition). This is a great companion for visually impaired users who already have screen reader software. This revolutionary one-touch scanning works with virtually any scanner. Converts printed text from a scanner with the press of a button. Scanned text appears on your computer screen. With powerful features such as PDF Import and summarization, users can significantly benefit from more access to alternative content and more efficiently digest large volumes of electronic documents.

Talking Word Processor® Talking Word Processor is a fully-functional word processing package that talks. It also includes auditory highlighting, word prediction, content summarization, highlight/extract capabilities, integrated dictionary and a variety of tools to assist in proofing your documents. All files can be saved in standard Microsoft Word format. It is an invaluable tool for teaching word processing and for general literacy.

Worksheet Wizard® The Worksheet Wizard is a learning tool optimized to work with worksheets and forms. It is ideal for filling out forms and adding annotations to existing PDF files or worksheets. The Worksheet Wizard solves the problem of how to work with documents that seem to be designed for handwritten completion.

Write Now® Write Now is a writing tool designed to help writers of all skill levels. It helps users compose small amounts of content prior to posting them to an application. It is compatible with ANY online or proprietary applications including cloud applications like Google Docs™, email, and Facebook. The "writing analyzer" processes the writing and provides specific information regarding word and sentence use, grade level and readability levels. Built-in composition features ensure content is correct BEFORE it becomes a permanent post into a document or on the Internet.

English Talking Dictionary® The English Talking Dictionary is a comprehensive and unabridged dictionary AND thesaurus that contains more than 250,000 words and definitions that can be read to you. It includes references to historical people, places, technical jargon and slang and will work with any computer application. With our new INTERLINK technology, relational word linking allows the user to search by idea or concept.

French Talking Dictionary® The French Talking Dictionary is a comprehensive and unabridged dictionary that contains more than 189,000 words and definitions that can be read to you in French. The FTD displays derivatives of the selected word; it allows the user to look up words without knowing the exact spelling; and, it can be used without leaving the current application.

PDF Builder® Premier PDF Builder makes combining and manipulating PDF files easy. PDF Builder creates PDF files from existing documents and captures scans from your scanner and puts them directly into a PDF file. It is also possible to merge two PDF files, delete pages from a PDF file, and even export a PDF file into six different formats.

Text-To-Audio® Text-To-Audio is a high-end application that can quickly and easily convert PDF files and electronic text to audio formats, including WAV and MP3. Create audio files of electronic study notes, textbooks or classroom handouts.

Talking Calculator® Talking Calculator works with or without a screen reader. Easy to use with large keys and contrasting colors, it displays your entries and your results as you work.
