

The Premier In-School Program

“Learning tools for each and every student in school”

Premier Literacy Canada is redefining learning solution products. Working to provide learning tools for EVERYONE, Premier developed the *Premier In-School Program*.

The In-School Program provides educational solutions that are designed to provide learning tools to the largest number of users in a cost-effective manner. The In-School tools support reading, writing and studying and are conveniently organized according to their purpose on the Premier Floating Toolbar.

The comprehensive collection of learning tools and a unique approach to licensing allow Premier to offer options and opportunities that do not exist anywhere in the learning technology software arena. With the Premier In-School Program, it is now within reach to provide learning solutions to each and every student within a board.

In-School Program Learning Tools

The Premier In-School Program capitalizes on the Premier Accessibility Suite of learning tools. The Suite contains *robust* and *easy-to-use* tools that will improve reading, writing, comprehension and learning by providing multiple channels for acquiring and retaining information. Each user can adjust software options based on their own *individualized* learning style. The Premier In-School Program supports the development of active study strategies and *encourages student achievement* for success in school and in life. The Premier In-School program supports the development of active study strategies and encourages student achievement and success.

The In-School tools include the following:

- ... Universal Reader Plus
- ... English Talking Dictionary
- ... French Talking Dictionary
- ... Talking Word Processor
- ... E-Text Reader
- ... PDF Equalizer
- ... PDF Magic Pro
- ... Scan and Read Pro
- ... Text-To-Audio
- ... PDF Builder
- ... Worksheet Wizard
- ... Talking Calculator
- ... Write Now
- ... Text Cloner Pro
- ... Talking Checkbook
- ... Premier Internet Toolbar

The Premier In-School Program

LICENSING

The Premier In-School Program is based on an unlimited board-wide license of our Accessibility Suite software. Quite simply, any computer that the board owns, leases or purchases within the license period is fully covered under the Premier In-School Program. Licenses are granted for a one year period and include access to unlimited Technical Support. Upgrades within the year are provided at no additional cost.

You also benefit from the Suite's **flexible deployment options**. Depending on the preferences of the board, the software can be deployed on your server using our Network Edition, pushed out to all workstations through the use of an image, installed on individual workstations using a CD or via any combination of these options.

ADDITIONAL OPTIONS

Premier Literacy Canada also offers additional options that are available only to participants in the Premier In-School Program.

Premier AT Home

Provide students, parents and faculty with easy access to the same technology at home that they use in school, making literacy technology a "lifestyle tool". Access is granted concurrently with the In-School Program for a one year period enabling students, parents and faculty to access literacy tools year round.

Premier AT Home is hosted via Premier's secure website that students can access from any computer. A unique Username and Password allow faculty, students and parents full access to Premier products.

Training

Premier can provide affordable on-site training to jumpstart your site's implementation of the Suite.

Supplemental Software Opportunities

Premier provides additional incentives for group and volume purchases of Premier products that are not included in the Suite. Applications like Test Builder, and Premier's portable products can be powerful tools in a teacher's arsenal.

The Premier In-School Program is a tremendous opportunity and an innovative approach to literacy and licensing that can benefit each and every student within an organization. Easy-to-use tools, flexible deployment options, unlimited technical support, access to free upgrades and board-wide licensing are the essential elements of the Premier In-School Program.

Universal Design has never been so attainable... so affordable... so available.
