

The Premier AT Home Program

The Premier AT Home program is an exciting program that is designed to provide students with access to the same literacy technology at home that they use while in school. By making literacy a "family affair", students and parents can embark on a literacy adventure together.

What are the advantages of Premier AT Home?

The elegance of the Premier AT Home program lies in its simplicity. Schools, which are currently under license with the Premier In-School program, are eligible to purchase the "AT Home Use" extension. Schools participating in the AT Home program are assigned a user name and password that will allow ALL students, parents and teachers to log in to the Premier AT Home site and download any of the Premier learning tools. Participants are able to log in from virtually any computer, making learning tools available each and every time they may be needed. The AT Home license runs for a full twelve months and is renewable each year.

"Having a parent or other caring person read aloud with their children helps children learn listening skills, vocabulary and language skills, as well as develop imagination and creativity." (*Family Literacy Foundation; 2001*)

Reasons to Choose Premier AT Home

- Strengthens the relationship between school, parent and teacher
- Increasing opportunities for student success
- Arms students, teachers and parents with the same tools and making them players on the same team
- Gets students accustomed to using learning tools as "lifestyle tools" in order to create a lifetime of success
- Unlimited access to 15 powerful and easy-to-use literacy tools
- 24 x 7 access to software designed to take the stress out of reading and writing
- With access to over 1,500 digital publications, students will also have material to read with their Premier learning tools

Make reading a "family affair" with Premier AT Home.

What are the advantages of Premier AT Home?

- **Deployment** - The Premier AT Home program eliminates potential distribution problems by hosting all the technology on a secure website that students can log into, select the programs they want and install them. Schools distribute a single user name and password which keeps the management of the system easy to understand and use for everyone.
- **Licensing** - The Premier AT Home program eliminates licensing issues by extending the AT Home license to any computer a student may be using thus allowing a student access to learning tools anywhere and anytime.
- **Tech Support** - Premier provides free technical support (via phone and email) for home users as well as in-school users.
- **Version Control** - Premier AT Home ensures that users are accessing the most current version of available software.
- **Site Hosting** - Premier hosts the site for schools participating in the AT Home program, thus eliminating such issues as, school network access, internet security and website maintenance.
- **Access to AT year round** - Since literacy challenges do not end when a student goes home, providing access to learning tools at home and year round is a natural progression to empowering students.
- **Content** - The Premier AT Home program includes access to the Premier E-Library, a comprehensive collection of over 1,500 digital publications. Not only will students have access to learning tools, they will have access to an entire library they can read.
- **English as a Second Language** - Premier AT Home, through translation features, supports English, French, Spanish, German, Italian, and Portuguese which aids students as they learn a new language.
- **Now with expanded French features** - The Premier suite of tools now includes three products with a choice of English or French interface and a French Talking Dictionary.
- **Training Videos** - Full access to on-line training videos provides valuable usage instruction.
